## How to use old magic chef oven

I have a Magic Chef stove (model: 31203KAW) which is not lighting/igniting. We're using a butane lighter to light the stove-top burners (the gas still flows) but I'm nervous about turning on the oven "just to check" (visions of suicidal housewives are dancing in my head). How do I relight the pilot light... if that's even what I need to do? Help please. 3 Photo Courtesy: Visage/Stockbyte/Getty Images We've always known the fast pace of modern life goes hand in hand with the convenience of microwave cooking. More recently, the unforeseen events of 2020 taught us that even when the world slows down, we still need the convenience of a reliable microwave when we just can't face cooking another meal. From defrosting the chicken you forgot to take out of the freezer to quickly reheating leftovers, a microwave is an essential tool to make life easier for your family — but it doesn't have to end there. Like most appliances, microwaves come in a range of quality levels. You don't have to spend a lot on a model, but investing in the best microwave you can afford definitely results in some cooking benefits. Many of the best microwave ovens come with additional features, such as grilling and broiling capabilities on specific Emerson and Panasonic models and Smart Sensor technology on Toshiba models to maximize the cooking of common foods like baked potatoes, pizza and popcorn. Check out these options and others to find the best microwave oven for your kitchen. MORE FROM CONSUMERSEARCH.COM Home - Diy Whirlpool Magic Chef makes several models of gas ovens with a pilotless ignition. This means you never have to worry about lighting a pilot manually—the oven uses an electronic system to ignite the gas. The Magic Chef oven is easy to use for all of your baking and broiling needs. A few Magic Chef oven instructions will get you started. The timer does not control the heating of the oven. Then oven will not work during a power failure or if it is unplugged. Setting the Clock and Timer Press "Clock" until the oven beeps once. Press the up and down arrows to set the correct time. Press the arrows to change the time in 1 minute intervals, or press and hold the arrows to change the time in 10 minute intervals. Press "Clock" to return to the time of day when the oven is in timer mode. Press "Timer" until the oven beeps once. Press the up and down arrows to set the correct baking time on the timer. Press the arrows to change the time in 1 minute intervals, or press and hold the arrows to change the time in 10 minute intervals. Three beeps sound at the end of the timer cycle, and one beep sounds every 10 seconds until the timer is canceled or 10 minutes has elapsed. Setting the Oven Place the oven racks in the desired position in a cool Magic Chef oven. Push the oven temperature knob in, and turn the dial to set the desired temperature. Place your baking dish of food in the center of the oven, at least 2 inches away from each oven wall. Close the oven door, and do not open it frequently, as that will increase the cooking time of your food. Push the oven temperature knob in, and turn the dial to set it to "Off" when your food is done. The Drip Cap Whirlpool Magic Chef makes several models of gas ovens with a pilotless ignition. Press "Clock" until the oven beeps once. Press the up and down arrows to set the correct baking time on the timer. Place the oven racks in the desired position in a cool Magic Chef oven. Photo Courtesy: Pixabay An electric skillet can make stovetop cooking a lot easier. Some meals can be cooked with a single skillet alone in half an hour or less, making them a boon for beginners and busy experts alike. However, not all skillets are created equally. Read on to learn about the best and most useful electric skillets for your kitchen. MORE FROM CONSUMERSEARCH.COM How long does an RV oven take to preheat? How do you light a camper oven? Where is the model number on a Magic Chef oven? How do you start a Furrion oven? What does fl mean on a Magic Chef stove? Who makes Magic Chef ranges? How do you calibrate a Magic Chef gas oven? How do you open a Magic Chef gas stove top? Set the oven's temperature to "Off", remove the stove's oven control knob, and push in on the metal control rod there while holding a lighter under that sprinkler head— this should cause the pilot to light. Hold the control rod in for a few seconds to allow the pilot to warm up the oven's thermocouple, then release it. How do you relight the pilot light on a gas oven? Relighting your pilot light – here's how to do it. Gear up. Get a microfber cloth and a lighter or match; a long-wand lighter is best. Shut down. Remove the grates. Open up the stovetop. Find the pilot port. Clean the pilot light area. Light the pilot light. Close it up. How do you use a Magic Chef gas oven? How to Use a Magic Chef Oven Press "Clock" until the oven beeps once. Press the up and down arrows to set the correct time. Press "Clock" to return to the time of day when the oven is in timer mode. Press "Timer" until the oven beeps once. Press the up and down arrows to set the correct baking time on the timer. Can I manually light my gas oven? If you don't have the owner's manual, open the oven door and look in the bottom of the oven for a small hole marked "Pilot Light" or something similar. If the oven is designed to be manually lit for each use, turn the temperature dial on slowly. The gas should ignite. Remove your hand and the match immediately. Why does my gas oven not ignite? An oven that won't heat is usually the result of a faulty igniter (for a gas oven) or heating element (for an electric oven). If both your gas oven and your gas burners have stopped working, the problem is most likely with the gas line, and will require professional repair. How do you light a gas stove with a lighter? Most gas stoves can be lit with a match or lighter if your igniter is broken. To ignite your match or lighter, turn the gas dial to medium. Hold the match or lighter close to the burner and wait for it to ignite. Remove your hand as soon as possible. How do I set the temperature on my Magic Chef oven? Calibrating the Magic Chef Stove Determine the calibration needed, using an oven thermometer. Press and hold the "Bake" button for approximately five seconds and then release it when "00" appears on the oven's display. Use the "+" and "-" buttons to adjust the oven calibration. How do I use my Magic Chef oven and broiler? How to Broil With an Old Magic Chef Oven Open the broiler door and roll out the broiler pan and the grid attachment. Prepare the broiler pan. Prepare the food for broiling. Begin the broiling process. Set the temperature. Adjust the temperature. Turn off the broiler. Where is the model number on my Magic Chef oven? The model number is located on a small metal plate on the oven; the sticker also includes the serial number, series number and other manufacturer information. The model number can be identified by a series of numbers or a mix of letters and numbers. How do you light a gas oven by hand? Hold a long match or lighter near or in the pilot light hole to light it. Light a long match with your hand that isn't holding the oven knob, or use a lighter with a long tip (like a BBQ lighter). Slowly move the flame towards the pilot light hole until it lights. How do you light a gas oven without an igniter? To light, a gas burner without electricity, first strike a match (we recommend the long wooden kitchen matches to lower the risk of burning yourself) and hold it directly next to the flame ports. Immediately turn the gas knob to the lowest possible setting. Your burner should ignite almost instantaneously. Do gas ovens have a pilot light? Most newer gas ranges and ovens don't have pilot lights. Instead, the gas is ignited by an electric ignition system. In this type of system, an element becomes hot and glows like the filament in a lightbulb when an electric current passes through it. The heat from the filament lights the gas. 06-17-2019, 05:42 PM #1 2 Rivet Member 1971 27' Overlander Findlay , Ohio Join Date: Nov 2017 Posts: 29 1971 Magic Chef Oven How-To (AKA Ovens for Dummies) First step is admitting my complete ignorance in this, which is like 98%. I want to see if my oven works and if not, why not. The previous owner said it did not work. There was a very very small amount of mercury in the bottom of it when I got it. Otherwise, I haven't done a thing (except remove the mercury). Any hints/suggestions on what to do next? Yes, there is a gas line (working) that goes to the oven. I'll start with an exterior and interior picture. Thank you in advance. Attached Thumbnails Attached Images 06-17-2019, 05:45 PM #2 4 Rivet Member 1971 31' Sovereign 1973 29' Ambassador 1978 31' Sovereign Palm Desert , California Join Date: Sep 2014 Posts: 365 There's a small amount of mercury in the thermostat so if it has leaked out your thermostat is bad. There are places that will rebuild them but it will set you back a couple hundred dollars. 06-17-2019, 05:59 PM #3 Rivet Master 2012 Avenue Coach Corpus Christi , Texas Join Date: Feb 2018 Posts: 1,717 Sorry I don't have a suggestion on testing the stove, but I do suggest you find a way to ensure all mercury traces have been removed before firing it up. 06-17-2019, 06:54 PM #4 Rivet Master 2019 22' Sport High River , Alberta Join Date: Aug 2006 Posts: 742 Make sure the gas is on. Turn the knob to pilot. Press and hold, light with a lighter. Hold for about 30 seconds until warm so the pilot light stays lit. Turn the thermostat up and the flame should travel right to left along the burner tube. Except it probably won't if the thermostat has leaked mercury. 06-17-2019, 09:35 PM #5 2 Rivet Member 1971 27' Overlander Findlay , Ohio Join Date: Nov 2017 Posts: 29 Thank you thus far. I was able to keep the pilot lit without much difficulty. When I turn the temperature to any setting, nothing happens. Does this mean the thermostat is broken? 06-18-2019, 06:42 AM #6 Rivet Master 2019 22' Sport High River , Alberta Join Date: Aug 2006 Posts: 742 Quote: Originally Posted by bwhitaker Thank you thus far. Based on CaCraig's reply, I would say yes. The oven is nice to have, but now you need to decide whether to repair or replace. 06-18-2019, 10:14 AM #7 4 Rivet Member 1972 23' Safari Placitas , New Mexico Join Date: Apr 2006 Posts: 305 Get Rid of It The Magic Chef oven in my 1972 Safari literally blew up in my face twice when I tried to light the pilot–fried bangs and singed eyebrows. Plus, the thermostat never worked and it would get hot enough to fire pottery. I liked the vintage look but it's not like it was one of those ones that was a cool retro color. I finally got a Suburban replacement that fits that odd-sized opening. Having a safe cooking appliance is really important. Actually, I got 3 Suburbans since the first two had pilots that wouldn't light and I had to send them back. (Note: Don't buy from eBay.) The new Suburban is black–which I don't like–but it's safe. No pilot for the burners which I like. It works ok. I use an oven thermometer and it takes a really long time to heat up. I put pizza stones in the bottom to help it maintain an even temperature. Messing around with a vintage stove is risky business unless you're an expert. gONNA HAFTA AGREE WITH BLUE HIWAY LADY ! Get a new oven. I spent \$200 getting my pilot assembly rebuilt at the recommended place and it was a waste of money...better yet, consider getting one of those cool slide out dishwashers to put in its place,,,,,that's where I am at now.... 1968 Overlander Land Yacht International Ford E-350 W V-10 boom! 2018 Chevy Tahoe smooooth Find a way to enjoy life and have fun, every day ! 06-18-2019, 06:12 PM #9 Rivet Master 1969 18' Caravel Greenville , whereEverIroam Join Date: Dec 2017 Posts: 1,239 You could probably find a replacement oven for cheaper than a repair, if you're not too concerned with keeping everything original. I never used the oven on my Magic Chef stove, so when I did a complete galley remodel last year, I replaced it and installed an drop-in surface range (top burners only) that has a cool glass top that closes flush with the counter top. Would a microwave there be better use of the space for you? Some love to do baking whilst camping. Others, like me, never do. 06-18-2019, 09:26 PM #10 Rivet Master 2019 22' Sport High River , Alberta Join Date: Aug 2006 Posts: 742 We used the oven regularly in our old Overlander. It was nice to be able to heat up a pizza without needing an electric connection. The microwave in our new trailer is nice, but I'm not sure which is the better option. 06-19-2019, 10:27 AM #11 Rivet Master 1977 Argosy Minuet 6.0 Metre 1973 21' Globetrotter 1975 26' Argosy 26 Vista , California Join Date: Sep 2006 Posts: 589 Find a used oven at a rv salvage yard. Use it for parts I have had 4 70s ovens in different trailers and motor homes, they all worked. I like having an oven i don't need a microwave. But that's just the way we do it. 06-20-2019, 09:43 PM #12 CC 1972 27' Overlander Heinsburg , AB Join Date: Jul 2018 Posts: 238 bwhitaker, I have just removed a like new magic chef from my '72 overlander (rather camp than cook). Let me know if you're interested. 01-03-2021, 01:21 PM #13 2 Rivet Member 1971 23' Safari Nashville , Tennessee Join Date: May 2005 Posts: 58 Quote: Originally Posted by Blu Hwy Lady The Magic Chef oven in my 1972 Safari literally blew up in my face twice when I tried to light the pilot–fried bangs and singed eyebrows.
